SUMMARY

DevOps / Platform Engineer with 2+ years of experience in building and maintaining high-availability e-commerce platforms. Skilled in CI/CD automation, infrastructure management, cloud platforms, and observability. Proven experience improving deployment efficiency, automating operational workflows using Ansible and AWX, and enhancing system reliability through monitoring and incident management. Passionate about scalable infrastructure, automation, and platform reliability.

PROFESSIONAL EXPERIENCE

Platform Engineer

HCL Technologies | 2024 - Present

- Led zero-downtime deployments for high-availability eCommerce applications in production environments.
- Automated operational workflows using Ansible and AWX, improving deployment efficiency by 40%.
- Managed the end-to-end lifecycle of web platforms, including deployment, monitoring, and performance optimization.
- Collaborated with DevOps and development teams to enhance CI/CD pipelines, platform reliability, and security using Akamai WAF.

Site Reliability Engineer

HCL Technologies | 2023 - 2024

- Built Dynatrace dashboards and alerts using DQL to improve observability during migration from Splunk to Dynatrace.
- Migrated centralized logging from Splunk to Grafana Loki, improving log performance and reducing cost.
- Integrated servers with Zabbix monitoring to enable real-time alerting and infrastructure visibility.
- Handled production incidents and root cause analysis (RCA) to maintain system reliability and uptime.

DEVOPS AUTOMATION

- Developed multiple Ansible and AWX automation workflows for tasks such as log cleanup, configuration management, and server maintenance across Linux environments.
- Automated operational tasks across servers, significantly reducing manual intervention and improving infrastructure efficiency
- Python GUI for Teams Messaging:
Built a Python GUI tool to send uniform messages to Microsoft Teams users, reducing manual communication tasks by over 90%.

EDUCATION

Yeshwantrao Chavan College of Engineering, Nagpur

Bachelor's of Engineering
2019 – 2023 | CGPA - 8

Mahatma Gandhi Junior College, Nagpur

Higher Secondary Education
2018 – 2019

CORE EXPERTIES

- CI/CD Pipeline Automation
- Infrastructure Automation
- Cloud Platform Operations
- Monitoring & Observability
- Incident Management

SKILLS

- Python Programming
- Automation: Ansible | AWX
- CI/CD: Jenkins | GitHub Actions
- Containerization & Orchestration: Docker | Kubernetes
- Version Control: Git | GitHub
- Cloud & Infrastructure: Azure | AWS | Linux
- Tools: Grafana | Dynatrace | Splunk | Zabbix
- Security: Akamai WAF
- Frontend Web Development | UI/UX Design

ACHIEVEMENTS

- Awarded "Rising Star" for outstanding contributions and rapid ramp-up as a fresher in the DevOps team.
- Awarded "Best Performer" for consistent high-quality delivery, strong ownership of responsibilities, and dedication toward improving platform reliability within the DevOps team.
